

SAFETY ALERT

Recently during night shift work at Jumeirah Heights construction site, a ready mix transit mixer began reversing towards the pump. In the process the driver accidentally drove above the safe limit of the access road. The load of the truck was concentrated on one side which resulted in toppling down the truck into the lake.

Driver had narrow escape from injury and the ready mix concrete got spilled in the lake.

The following minimum requirements must be adhered to:-

- ➔ Clear illumination to be provided all around the work site.
- ➔ Banks man must be available for such activities.
- ➔ Transit mixer drivers must adhere to the site traffic regulations.
- ➔ Appropriate hard barriers must be in place near the excavations / lakes.
- ➔ Clear reflective signs must be provided all around access roads.
- ➔ Project traffic plan must be prepared and implemented for such risks.
- ➔ Relevant information must be conveyed to drivers.
