

ENVIRONMENT, HEALTH AND SAFETY

SUSTAINABILITY DEPARTMENT

CIRCULAR: EHS/GB/04/12

TO : All Business Units Of Dubai World, Their Clients , Green Building Consultants, Architectural & Engineering consultants, Contractors and relevant stakeholders

SUBJECT : Guideline -Green Building Implementation Kit for Stakeholders

DATE : 14 June 2012

Greetings from EHS!

EHS (Environment, Health & Safety) as Local regulatory authorities based in Dubai, are responsible for enforcing the Green Building regulations for all the projects within its jurisdiction. Part of the responsibility also includes creating the right awareness and regulatory support to make certain that the so called forward looking sustainability regulations are genuinely implemented on the project and not confined to a mere paper exercise.

Keeping this intent and concern in focus, the sustainability department of EHS has created a guideline titled “Green Building Implementation Kit “ for Stakeholders, a brief document which EHS believes, if followed in principle over the course of the project, would lead to practical sustainability.

The Direct links to the Guideline is

<http://www.ehss.ae/forms/guidelinenogb-006greenbuildingimplementationkit.pdf>

The stakeholders are urged to make use if this document to add value to their projects.

EHS is fully committed to sustainability of the built and operating environment and is more than willing to assist the stakeholders in their initiatives on existing buildings. Should you have any queries or require additional information/guidance, please do not hesitate to contact us at EHS.GreenBuilding@trakhees.ae

Regards,

P.R.Jagannathan
