

## ENVIRONMENT, HEALTH AND SAFETY

### SUSTAINABILITY SECTION

#### CIRCULAR: EHS/GB/06/12

**TO :** All Architectural & Engineering Consultants, Contractors and relevant Stakeholders of Dubai World Jurisdiction

**SUBJECT :** EHS Training on Regulatory Compliance – Green Building Regulations for Warehouses and Industrial Developments

**DATE :** 4 September 2012

Greetings from EHS.

You would recall that EHS released its “Green Building Regulations for Warehouses and Industrial developments” in Dec 2011. This was a landmark decision considering that it was developed fully In-house, predominantly prescriptive and was rendered in a fashion that it could be administered by an experienced AEC/ Engineer of record.

During the Awareness sessions carried out subsequent to its release, EHS had expressed its intention to conduct training sessions in due course so as to help the consultants and contractors familiarize with the regulations in terms of understanding the Regulations, compliance requirements and submission strategies so that the stakeholder is able to put together a proper and coherent submission.

In line with this commitment, EHS sustainability section has introduced this Mandatory training program which at a basic level is applicable to all the stakeholders that are part of the Green Building submission process for the projects that fall under the purview of “Green Building regulations for warehouse and industrial developments”. The program, besides providing an overview of this regulation in entirety, would also greatly assist in understanding the sequence and structure of the submissions required during NOC-BP and NOC-BCC and it is expected that it would save time and resources spent in the submission, review and approval processes. Details as under

Course Title	Duration	Who should attend
EHS Training on Regulatory Compliance – Green Building Regulations for Warehouses & Industrial Developments	1 Day Program (8.00 AM to 3.30 PM)	Project managers, Architects, Engineers, Main Contractors, Project Coordinators, Sub Contractors & other relevant professionals involved with the subject

EHS therefore requires all contractors and consultants to make necessary arrangements to get themselves as well as their staff, trained and certified by Trakhees-EHS with immediate effect.

For Registration or Inquiry about this program including the schedule, please email us on [EHS.Accreditation@Trakhees.ae](mailto:EHS.Accreditation@Trakhees.ae) or contact EHS Accreditation at 04 806 8888.

Have a good day!

Regards,

**P.R.Jagannathan**
